Summary

Detail-oriented WordPress Developer with expertise in building responsive, high-performing websites and custom e-commerce solutions. Proficient in theme and plugin customization, UI/UX optimization, and web performance using Elementor and WooCommerce. Blends a solid technical background in Computer Science with practical experience in data annotation and web scraping to build user-focused, SEO-friendly digital experiences.

Education

ILMA University

Computer Science

Bachelor of Science

Karachi, Pakistan • December 2024

Specialized in Software Engineering, Database Systems, and Web Application Development.

Experience

ELEVATE TALENT & MARKETING (Remote)

WordPress Developer

Markham, Canada

July 2024 - Present

Develop and customize responsive, high-performing WordPress and WooCommerce websites using Elementor Pro, WPBakery, and custom PHP. Successfully improved website page speed scores by 35% and increased organic traffic through targeted technical SEO optimizations. Oversee payment gateway integrations, security patching, and core updates, collaborating with UI/UX designers to boost user engagement and conversions by 15%.

GRAND DIGITALS PVT LTD

Data Scraping Specialist

Karachi, Pakistan

March 2024 – June 2024

Engineered and maintained automated Python web scraping scripts using Scrapy, BeautifulSoup, and Selenium to reliably extract over 100K data points weekly. Cleaned, validated, and structured complex unstructured web data into high-quality JSON and CSV formats, utilizing IP rotation strategies to maintain a 98% scraper success rate across dynamic platforms.

GRAND DIGITALS PVT LTD

Data Annotator

Karachi, Pakistan

July 2023 - February 2024

Precisely labeled and annotated over 20K high-quality text and image dataset points for machine learning and computer vision models. Partnered closely with data scientists to audit annotations and refine labeling guidelines, ensuring a 99% data accuracy rate and accelerating model training cycles by 20%.

Skills

Skills

Projects

E-Commerce Platform Optimization2024

Developed and optimized a dynamic, responsive e-commerce storefront utilizing Elementor Pro and custom child themes. Built secure payment integrations and executed image optimization rules, decreasing site load times by 1.2 seconds and enhancing mobile UI compliance.

Real-Time Slack Chat Extractor Bot2024

Built a real-time Slack chat extractor bot using Python, Scrapy, and BeautifulSoup to scrape server messages from historical archives to current live feeds. Automatically compiled channel structures, usernames, timestamps, and chat content into a clean, human-readable JSON format across multiple channels.
